Trees Growing in Churches. A curiosity of vegetation exists in the shape of a good-sized pine tree growing on a ledge of a facade of the ancient cathedral church of Fenioux (Charente Infericure), France. This is paralleled by the tree which grows out of a window of the round tower at the Church of St. Benedict, Norwich, and many other instances in the United Kingdom. In the old church of Ross, at Herefordshire, two thriving elms are growing, one on each side of a passage between the pews. They are said to have sprung up from the pavement beside the pew once occupied by John Kyle, who, at considerable expense, planted elms about his native town .-
